KAIQAU GROUP PROFILE

凯泉集团简介

Shanghai Kaiquan Group is a large-scale comprehensive pump company integrating the design, production and sales of pumps, water supply equipment and control equipment for pump and is the leading company in China pump industry. The Group has over 5,000 existing employees and 80% of them have college degrees or above, of which there are more than 750 engineering technicians composed by the national well-known water pump experts and professors, doctors and masters and senior and middle-level engineers to form the innovative echelon talent structure. Its total assets reach RMB 2.5 billion and it has 7 enterprises in Shanghai, Zhejiang, Hebei, Liaoning, Anhui and other cities and provinces and 5 industrial zones, with total cover area of 1,000 mu and productive construction area of 350,000 m². Shanghai Kaiquan Group has been granted many honorable titles, such as "Shanghai Gold Award for Quality", "No. 4 of Top 100 Private Enterprises of Shanghai", "Top 100 Science-and-Technology Enterprises of Shanghai", "Chinese Quality Credit Rating AAA", "National Contract Credit Rating AAA", "Excellent Enterprise in Quality, Credit and Service", "Chinese Most Competitive Commodity Trademark", and "National Advanced Enterprise in Enterprise Cultural Development", and it is selected into national top 500 mechanical enterprises for the third year in a row and takes the first place in the pump industry.

上海凯泉集团是集设计、生产、销售泵、给水设备及泵用控制设备于一体的大型综合性泵业公司，是中国泵行业的龙头企业。集团现有员工5000多人，80%员工具有大专以上学历，其中工程技术人员750多名，主要由全国知名水泵专家教授、博士硕士、中高级工程师构成，形成了具有创新思维的梯队人才结构。总资产达25亿元，在上海、浙江、河北、辽宁、安徽等省市拥有7家企业，5个工业园区，总占地面积近1000亩，生产性建筑面积35万平方米。上海凯泉集团获得了“上海市质量金奖”、“上海市私营企业百强第四名”、“上海市科技百强企业”、“中国质量信用AAA级”、“全国合同信用等级AAA级”、“质量、信誉、服务三优企业”、“中国最具竞争力的商品商标”、“全国企业文化建设先进单位”等荣誉称号，2013年凯泉连续第3年入选全国机械500强，并名列泵行业之首。

SHIJIAZHUANG KAIQUAN IMPURITY PUMP CO.,LTD

石家庄凯泉杂质泵有限公司

Shijiazhuang Kaiquan Impurity Pump Co., Ltd. is a wholly-owned subsidiary of Kaiquan Group, which engages in the scientific research and development and production of the impurity pump and relevant products. The Company was founded in May, 2005 and is located at Zhengding Science and Technology Industrial Park, Shijiazhuang, with total cover area of 65 mu and construction area of 22,000 m². The Company integrates the scientific research and development and production and has the design, casting, machining and assembly of water pump, and heat treatment, physical and chemical analysis, water pump test center and other complete scientific research, production, detection and test means to provide strong supports for the production of first-class products. The Company owns the modern casting workshop, advanced international level of resin sand production line, advanced continuous mixer and other equipment, and the water passing parts adopt the resin sand.3-ton and 1-ton medium frequency furnaces are set to make the alloy casting which can weigh 8 tons. The furnace is equipped with the spectrum analyzer in the front to ensure the accuracy of material compositions. The comprehensive machining plant covers an area of 11,200 m² and has over 200 sets of various equipment, such as 4M vertical lathe, 2.5M vertical lathe, universal borer, CNC milling machine and CNC lathe. Its annual output value reaches RMB 200 million.

石家庄凯泉杂质泵有限公司，是凯泉集团所属从事科研开发、生产制造杂质泵及相关产品的全资子公司。公司成立于2005年5月，位于石家庄市正定科技工业园，总占地面积65亩，建筑面积22000平方米。公司集科研开发、生产制造为一体，拥有水泵设计、铸造、机械加工、装配，以及热处理、理化分析、水泵测试中心等完整的科研、生产、检测和试验手段，为生产一流的产品提供了强有力的支持。公司拥有现代化的铸造车间，拥有国际先进水平的树脂砂生产线和先进的连续式混砂机等设备，过流部件全部采用树脂砂造型；设有3吨、1吨中频电炉，可铸单件达8吨重的合金铸件；配备有炉前光谱分析仪，确保材料成分的准确性。机加工综合厂房11200平方米，拥有4M立式车床、2.5M立式车床、万能镗床、数控铣床、数控车床等各种设备200余台套，年产值两亿元。

TEST PLATFORM

测试平台

Test Bench for Large Pump
大泵试验台

- The tank capacity reaches 13,000 m³, the height of crane on the test bench is 24 m, the lifting weight of each hook is 200 tons, and the maximum pumping flow measured is 25 m³/s. The voltage is 10kV, the maximum motor power measured is 25,000 kW, and it can test the large pump with the diameter of 3,000 mm. It is the largest water pump test bench in China. It is mainly used to measure the full speed and full flow of the main circulation pump, condensate pump, large double suction pump, etc. in the million-kilowatts-class thermal power and nuclear power conventional.

水池容量达到 13000m³，测试台行车高 24m，单钩起吊 200 吨，最大被测泵流量 25m³/s。电压 10kV，最大被测电机功率为 25000kW，可测试口径为 3000mm 的大型泵。为国内最大的水泵测试台。主要用于万千瓦级火电及核电常规主循环泵、凝结水泵和大型双吸泵等泵的全速、全流量测试。

Thermal Shock Test Bench
热冲击试验台

- The thermal shock test bench of Kaiquan has passed the identification by the domestic experts and reaches the requirements of the thermal shock test.
- It can carry out the thermal shock test to verify the working conditions and functions of the secondary and triple - stage pumps of 1,000MW nuclear power plant.

High - Precision Enclosed Test Bench
高精度闭式试验台

- This test bench is mainly used for the test of model pump of the excellent hydraulic model developed by the Company, and it is the multi-function four - quadrant in-situ calibration test bench for water pump research and reaches the world advanced level. With the comprehensive precision of 0.25%, it can accurately test the all performance parameters of the model pump.

High - Voltage Test Bench at a High - Temperature
高温高压试验台

- It can carry out the full speed test of the high-temperature and high-pressure vacuum machine of the main water supply pumps in the million-kilowatts-class thermal power and nuclear power conventional. Simulating the working condition of the pump in-service use by the test bench verifies the various performance indexes and liability indexes of the pump.

可以进行万千瓦级火电及核电常规主给水泵的高温高压真机全速试验，通过测试台模拟泵实际使用时的工况，验证泵的各项性能指标和可靠性指标。

TEST PLATFORM

测试平台

Test Center for Large Water Pump
大型水泵测试性能中心

- The tank capacity reaches 2,000 m³, the voltages are 380 V, 6 kV and 10 kV, the maximum pumping flow measured is 9 m³/s and the maximum motor power measured is 2,200 kW. It can test the water pump with the diameter of 1,200 mm and is mainly used for the type test and full performance test of various kinds of large products of the Company.

水池容量达到 2000m³，电压为 380V、6kV、10kV，最大被测泵流量 9m³/s，最大被测电机功率为 2200kW，可测试口径为 1200mm 的水泵，主要用于公司各类大型产品的型式试验和全性能试验。

Test Bench of Hefei Plan
合肥工厂测试台

- It uses the cofferdam test method, the maximum pumping flow measured reaches 20 m³/s, the voltages are 380V, 600V, 3KV, 6KV and 10KV, and the maximum motor power measured is 6,000 KW, It is mainly applied to the large high-pressure submersible electric pump.

采用围堰式测试方法，最大被测泵流量可达 20m³/s，电压为 380V、600V、3kV、6kV、10kV，最大被测电机功率为 6000kW，主要用于测试大型高压潜水电泵。

Automatic Open Test Bench
开式全自动试验台

- The tank capacity reaches 800 m³, the voltages are 380 V, the maximum pumping flow measured is 4000 m³/h and the maximum motor power measured is 315 kW. It can test the water pump with the diameter of 600 mm and is mainly used for the type test and full performance test of various kinds of products of the Company.

水池容量达到 800m³，电压为 380V，最大被测泵流量 4000m³/h，最大被测电机功率为 315kW，可测口径为 600mm 的水泵，主要用于公司各类产品的型式试验和全性能试验。

The vacuum pump test stand has been changed to the desulphurization pump test stand
脱硫泵测试台

- 10kV High Voltage Test Stand with Automatic Control and Data Acquisition 12000m³/h Maximum Test Flow 12000m³/h Maximum Test Motor Power 800kW It can be used to test the performance of a large scale desulphurization pump with a diameter of 900 mm

10kV高压测试台，全自动控制和数据采集，最大测试流量12000m³/h，最大被测电机功率800kW，可对900口径以下的大型脱硫泵进行全性能测试。

MANUFACTURING CAPACITY

制造能力

• WFT Five-axis four-linkage horizontal boring and milling machining center (Country: Czech)

WFT13 五轴四联动卧式镗铣加工中心 (捷克)

• AC46TM-4000 heavy high-precision vertical turn-milling center (Country: Italy)

AC46TM-4000 重型高精立式车铣中心 (意大利)

• Nine-axis five-linkage floor-type boring and milling machining center

九轴五联动落地镗铣加工中心

• Numerical control floor-type boring and milling lathe

数控落地镗铣床

• KVL-1600ATC+CII CNC vertical turn-milling center

KVL-1600ATC + C-II型数控立式车铣中心

• Heat treatment workshop

热处理车间

MANUFACTURING CAPACITY

制造能力

TRT314HS 六轴五联动 (意大利)

• Profilmill4000/100-T six-axis five-linkage gantry boring and milling machining center (Country: Germany)

ProfilMill 4000/100-T 六轴五联动龙门镗铣加工中心 (德国)

• 5 m CNC vertical lathe
5米数控立式车床

• Five-axis five-linkage machining center
5轴 5 联动加工中心

• 8 m large digital vertical lathe
8米大型数显立车

• 10 m CNC vertical lathe
10米数控卧式车床

TECHNICAL ADVANTAGES

技术优势

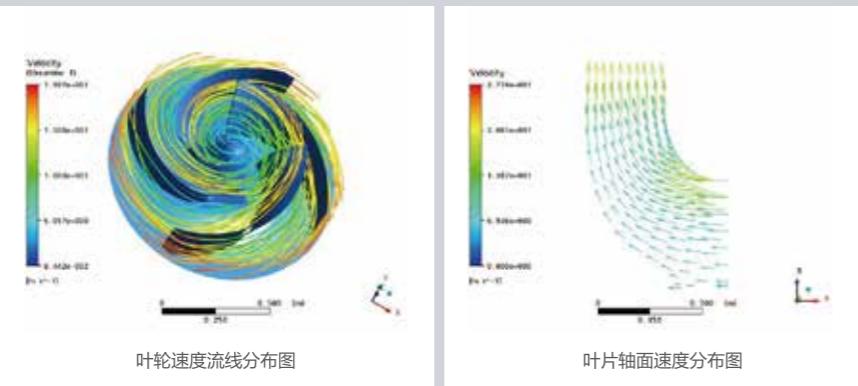

- At present, Shijiazhuang Kaiquan Impurity Pump Co., Ltd. has over 30 engineering technicians, 6 hydraulic machinery experts and 3 senior engineers and owns powerful technology R&D strength.

目前石家庄凯泉杂质泵有限公司拥有工程技术人员 30 余名 ,水力机械专家 6 人 ,高级工程师 3 名 , 拥有雄厚的技术研发实力。

- The international advanced CFD software system is adopted for the hydraulic test and analysis of all pumps, research the flow state of the fluid of the medium in details to optimize the product design scheme and exactly grasp hydraulic performance of the product.

所有泵型均采用国际先进的 CFD 软件系统进行水力测试分析 , 详细研究介质的流体流态 , 进而优化产品的设计方案 , 从而能够准确把握产品的水力性能。

MAIN DESULPURIZATION SLURRY CIRCULATING PUMP

脱硫主浆液循环泵

Material Code 材料代号	Main Compositions% 主要成分 %				Mechanical Performance 机械性能		Performance Introduction 性能介绍	Similar Mark 类似牌号
	C	Cr	Ni	Mo	δb(MPa)	HRC		
A49	1~2	26~30	2~3	2~3	≥610	HB≥400	Good corrosion resistance of dual phase steel; high corrosion resistance of white iron cadmium; a good using effect in chloride environment. 具有双相钢的良好耐腐蚀性，同时具有高铬白口铁的耐磨性，在含氯离子的环境中具有很好的使用效果	0Cr26Ni2Mo2Cu1.5 (F30%CrMo)
2605N	≤0.03	26~28	4.5~6.5	3~5	≥670	HB≥270	Duplex stainless steel; good corrosion resistance and abrasion resistance; equivalent to CD4MCu (American corrosion resistant metal materials); in the desulfurization environment the using effect can be better. 双相不锈钢，耐蚀耐磨综合性能好，相当于美国的CD4MCu，在脱硫环境中使用效果较好	1.4460
2507	≤0.03	24~26	6~8	3~5	≥730	HB≥270	Excellent pitting corrosion, crevice corrosion and well-distributed corrosion resistance. 具有极好的抗点腐蚀、缝隙腐蚀和均匀腐蚀的能力	1.4410
2205	≤0.03	22~23	4.5~6.5	3~5	≥670	HB≥270	Excellent stress corrosion cracking resistance, especially in chloride environment 具有优异的耐应力腐蚀破裂的能力，尤其在含氯离子的环境中	1.4462
MM-4	≤0.03	24~26	4~6	1.5~2.5	≥588	HB≥220	In the case of solid phase, there is relatively good abrasion and corrosion resistance; good corrosion resistance in nitric acid, sulfuric acid and organic acid environment 在有固相的情况下，有较好的耐磨性和耐蚀性，在硝酸、硫酸及有机酸中有较好的耐蚀性能	00Cr25Ni6Mo2
904	≤0.03	19~21	24~26	4~5	≥485	HB≥115	In sulfuric acid, acetic acid, formic acid and phosphoric acid environment there is excellent corrosion resistance; because of low carbon content, high chromium and molybdenum content, there is also strong pitting corrosion resistance. 在硫酸、醋酸、甲酸、磷酸等有极好的耐蚀性，由于碳含量低，铬和钼含量高，因此有较强的抗点蚀能力	1.4539

PRODUCT OVERVIEW

产品概述

KQTL(R) desulphurization pumps are horizontal centrifugal pumps of single-stage and single-suction, developed and researched by our company for desulphurization purification plant of coal-fired device in the thermal power plant, and mainly as absorber recirculation pumps of the wet FGD device to transport the limestone and gypsum slurry. Using the features of domestic and foreign similar products, the product has the advantages of broad flow range, safe and liable operation, easy to maintain, efficient and energy saving, long service life, etc.

KQTL (R) 系列脱硫泵为单级单吸卧式离心泵，是我公司针对火电厂燃煤机组脱硫净化装置而开发、研制的，主要作为湿法FGD 装置中吸收塔循环泵使用，输送石灰石与石膏浆液。产品借鉴了国内、外同类产品的特点，具有流量范围宽、运行安全可靠、检修方便、高效节能、使用寿命长等优点。

PRODUCT FEATURES

产品特点

- It adopts the two-phase flow theoretical design and its impeller adopts hydraulic model design optimized by CFD, with reasonable structure, good entire performance, steady operation and high efficiency.
- It uses the bearings with high load-bearing capacity and diluted oil lubrication in large oil pool to ensure the long service life of the bearing. And for the temperature rise, the bearing uses the platinum thermistor for temperature control and online measurement of bearing temperature.
- The shaft seal uses the cartridge mechanical seal specially designed for desulphurization (various flushing plans, flushing and intermittent flushing), with convenient and accurate disassembly, high reliability and long service life.
- The water passing part is made of the special desulphurization material A49 or dual-phase steel, with good abrasion resistance and corrosion resistance performance and long service life.
- The pump is connected with the motor or reducer by the diaphragm coupling, with good dynamic balance, strong resistance to shock, large transmission torque, steady pump running and safety and reliability.
- The pump structure is rear dismantlable, simple and easy to maintain. There is no need to disassemble the suction and rising pipes.
- The unique stainless split type impeller disassembly ring can easily realize the impeller disassembly.
- The rotor part is equipped with the axial regulating structure to make the pump machine in the efficient operating state always.
- 采用两相流理论设计，叶轮经 CFD 优化水力模型设计，结构合理，整体性能优良运行稳定，效率高。
- 轴承采用高承载能力的轴承，大油池稀油润滑，可以保证轴承的长使用寿命轴承的温升采用铂热电阻进行温度监控，在线检测轴承温度。
- 轴封采用专门为脱硫设计的集装式机械密封（多种冲洗方案，冲洗或间断性冲洗）拆装方便、准确，可靠性高、使用寿命长。
- 过流件采用脱硫专用材质 A49 或双相钢，耐磨耐腐性能优良，使用寿命长。
- 泵与电机或减速机采用膜片联轴器连接，动平衡性好，抗冲击能力强，传递扭矩大，泵运转平稳，安全可靠。
- 泵为后拆式结构，结构简单，维修方便，无需拆卸泵的进出水管路。
- 独特的不锈钢分瓣式叶轮拆卸环，轻而易举实现了叶轮的拆装。
- 转子部件设有轴向调节结构，使泵机组始终处于高效运行状态。

DISSASSEMBLY METHOD OF KQTL DESULPHURIZATION PUMP

KQTL脱硫泵拆装方式

Front dismountable type

前拆式

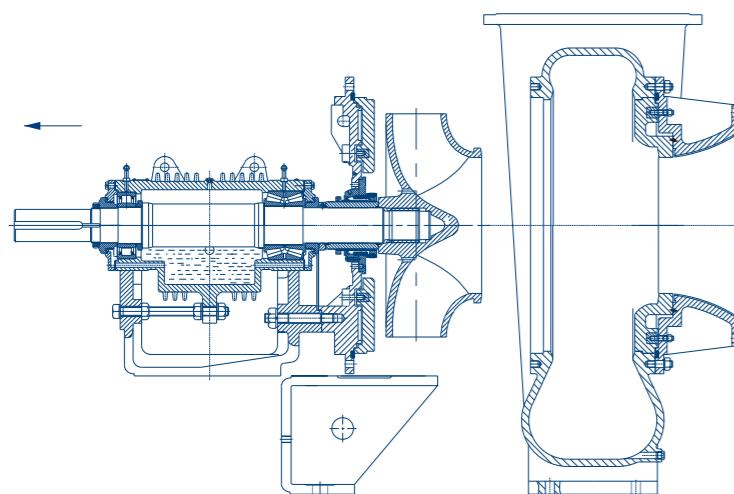

After dismounting suction cover, the front fender, impeller and mechanical seal and other parts can be dismounted without moving pump body.

拆下吸入盖后，不用移动泵体可将前护板、叶轮、机械密封等件拆下。

Rear dismountable type

后拆式

After dismounting lengthened coupler, the rotor can be wholly extracted without moving pump body and support.

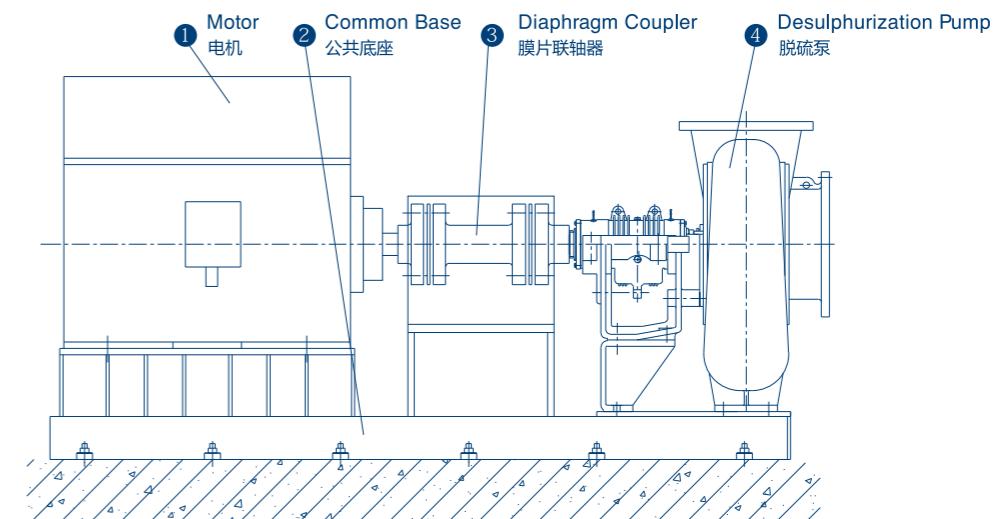

拆下加长联轴器后，不用动泵体和支撑，可将转子整体抽出。

INSTALLMENT METHOD OF KQTL DESULPHURIZATION PUMP

KQTL脱硫泵安装方式

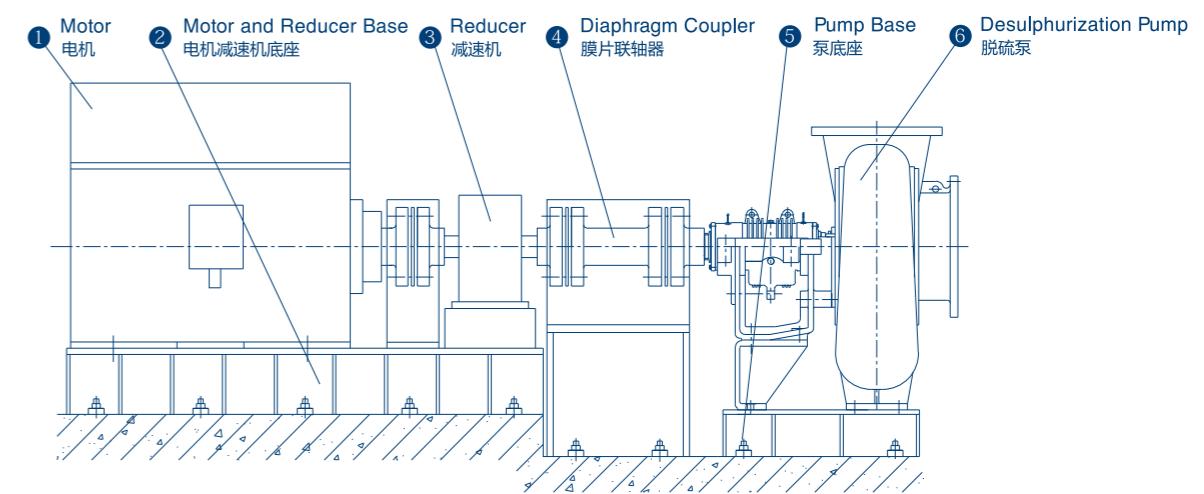

Installation method of common base of pump + motor

泵+电机公共底座安装方式

Installation method of fission base of pump + motor + reducer

泵+电机+减速机分体底座安装方式

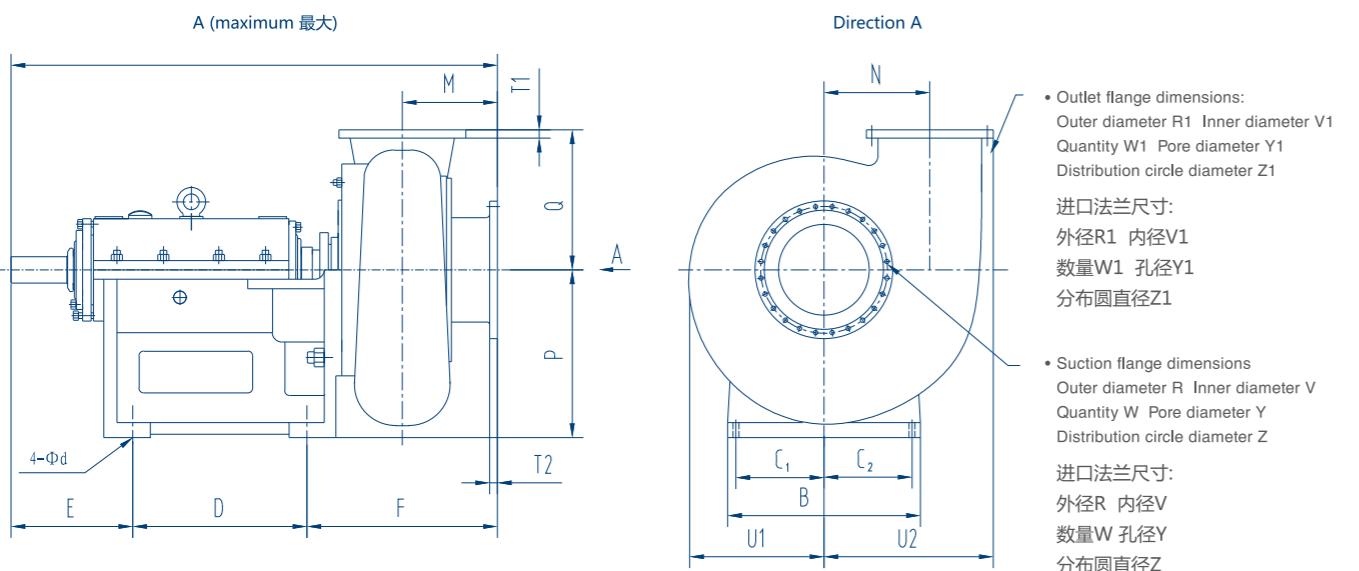

Note: In case of other transmission modes, our company can implement special design according to the user requirement

注：如需其它传动方式，我公司可根据用户要求特殊设计

PUMPA FOR DESULPHURIZATION AUXILIARY SYSTEM

脱硫辅助系统用泵

PRODUCT OVERVIEW

产品概述

The pump series are mainly as the pumps for auxiliary system in wet desulphurization device to transport the limestone, gypsum slurry, etc. Using the features of domestic and foreign similar products, the product has the advantages of broad flow range, excellent performance, safe and liable operation, easy to maintain, efficient and energy saving, long service life, etc. It adopts the materials of good wear resistance and corrosion resistance, and the structure of pump is compact.

该系列泵主要作为湿法脱硫装置中辅助系统用泵，用于输送石灰石与石膏浆液等。产品借鉴了国内、外同类产品的特点，采用耐磨耐蚀材料，泵结构紧凑，具有流量范围宽、性能优越、运行安全可靠、检修方便、高效节能、使用寿命长等优点。

PRODUCT FEATURES

产品特点

- It adopts the two-phase flow theoretical design and CFD overall optimization and increase the clearance between the baffle tongue and impeller to reduce the wear of baffle tongue, reduce the non-uniform flow of impeller periphery, lower the vibration and noise, improve the efficiency and prolong the service life of pump.
- It adopts the international advanced cartridge mechanical seal, with the long service life and convenient installation and replacement.
- Series, big bracket and large-sized axis diameter design and smooth and reliable running.
- The water passing part is made of the wear resistant and corrosion resistant materials, with long service life.
- 采用两相流设计理论、CFD 全面优化，增加隔舌和叶轮之间的间隙，减小了隔舌磨损，减轻了叶轮外围流动的不均匀性，降低了振动和噪音，效率提高，延长了泵的使用寿命。
- 采用国际领先的集装式机械密封，使用寿命长，安装与更换方便。
- 系列化、大托架、大轴径设计，运转平稳可靠。
- 过流件采用耐磨耐腐材料，使用寿命长。
- 高端配置，轴承采用优质轴承，密封采用国内一流机械密封

MODEL SIGNIFICANCE

型号意义

KDT 150 — A 50 (48)

Impeller diameter is cut to 48cm by 50cm of prototype pump
叶轮直径由原型泵50cm切割为48cm
Number of impeller blade (A5, B4, C3, D2, A are not labeled)
叶轮叶片数 (A5 , B4 , C3 , D2 , A 不标注)
Outlet diameter of water pump 150 mm
泵出口直径150mm
Kaiquan desulphurization pump
凯泉脱硫泵

KZJL 150 — A 35 (32)

Impeller diameter is cut to 32cm by 35cm of prototype pump
叶轮直径由原型泵35cm切割为32cm
Number of impeller blade (A5, B4, C3, D2, A are not labeled)
叶轮叶片数 (A5 , B4 , C3 , D2 , A 不标注)
Outlet diameter of water pump 150 mm
泵出口直径150mm
Kaiquan desulphurization pump
凯泉脱硫泵

SERVICE COMMITMENT

全国销售服务网络

Wholehearted service, sincere and trustworthy
竭诚服务，至诚守信

The marketing network of Kaiquan is all over the country, including 30 branches and service centers, 170 service districts, 341 offices and 341 service networks. Kaiquan establishes the largest direct marketing system in domestic pump industry, and sincerely provides tailored individual water supply and drainage solution and zero-distance intimate service for users.

凯泉的营销网络遍布全国，拥有 30 家分公司及服务中心、170 个服务片区、341 个办事处及 341 个服务网点，建立了国内泵行业最具规模的直销体系，竭诚为广大用户提供量体裁衣的个性化给排水解决方案和零距离的贴心服务。
